

## I No Longer Know You

I feel the vibe

You're sending to me

Not sure who, how or why

This all came to be

Your once tender kiss

Is now an icy cold stare

And that look in your eyes

Tells me you no longer care

Can you tell me what happened

And where did we go wrong

And how without a word

You so easily moved on

*I no longer know you*

*I no longer know you*

*Nothing to I say*

*Nothing to do*

*Cuz, I no longer know you*

Do you feel the vibe  
I'm sending back to you  
It's a white flag surrender  
That says, we are thru

No need for small talk  
Our time has come to an end  
And nothing remains  
To repair, fix or mend

Can you tell me what happened  
And where did we go wrong  
And how without a word  
You so easily moved on

*I no longer know you*

*I no longer know you*

*Nothing to I say*

*Nothing to do*

*Cuz, I no longer know you*

Instrumental

## Bridge

A million miles away  
Has come to be  
The distance that has grown  
Between you and me

Surprised by your call  
And the tone in your voice  
Your pre-rehearsed lines  
Left me no choice

Never saw it coming  
Missed the warning signs  
And now you're just a memory  
Fading from my mind

Can you tell me what happened  
And where did we go wrong  
And how without a word  
You so easily moved on

*I no longer know you*  
*I no longer know you*  
*Nothing to say*  
*Nothing to do*  
*Cuz, I no longer know you*

As I bid you  
A final tearless adieu  
I realize you're someone  
I never really knew

*I no longer know you*  
*I no longer know you*  
*Nothing to say*  
*Nothing to do*  
*Cuz, I no longer know you*  
*I no longer know you*  
*I no longer know you*  
*I no longer know you*  
*Who the f@#% are you?*
